

Marie Link is founder and president of REMS Logic healthcare technology company; specializing in Risk Evaluation and Mitigation Strategies (REMS). REMS Logic promotes appropriate management of high-risk medications through application of proactive medication use strategy and enhanced provider-patient communication as a way to lessen incidence of adverse drug events and patient harm.

Prior to REMS Logic, Marie worked for University Hospitals (UH) of Cleveland (2004 – 2013) where she served as system medication safety officer. There she was responsible for performance improvement with use of medications by all clinical disciplines, across 18 facilities and reported to hospital leadership (System COO, CMO, CNO, CIO, President of Quality) on progress

and outcomes. During her tenure at UH, Marie was successful in leading initiatives in the areas of quality and standardization, organizational regulatory compliance, formulary control and drug harm liability reduction. Marie brings with her 22 years experience in healthcare and pharmacy practice and is passionate about Healthcare Information Technology (HIT) innovation, Clinical Decision Support (CDS), and advanced data analytics that accelerate medication safety practice.
