Re: 45 CFR Part 170; RIN 0991-AB82: Health Information Technology Standards, Implementation, and Certification Criteria for Electronic Health Record Technology, 2014 Edition; Revisions to the Permanent Certification Program for Health Information Technology

Dear Mr. Posnack:

On behalf of the membership of the Pharmacy e-Health Information Technology Collaborative (Collaborative), we are pleased to respond to the Health Information Technology: Standards, Implementation Specifications, and Certification for Electronic Health Record Technology, 2014 Edition; Revisions to the Permanent Certification Program for Health Information Technology Notice of Proposed Rulemaking published in the Federal Register on March 7, 2012.

The Collaborative submits its comments in the attached document. The Collaborative is supportive of the proposed revisions to the permanent Certification Program for Health Information Technology as it applies to the objectives of the EHR Incentive Program in Meaningful Use—Stage 2; however, we are concerned that some of the proposed measures will become unfunded mandates (these areas are noted throughout our attached comments). Pharmacists are ineligible for EHR incentives, though they will need to exchange information with EHR systems to connect to and ensure needed bidirectional communication with EPs. As implementation of Stage 2 moves forward; especially with regard to the certification criteria for EHR technology, it should not create additional or financial burdens on pharmacists, such as becoming an unfunded mandate.

Pharmacy e-Health Information Technology Collaborative
| 401 Holland Lane Suite 702 | Alexandria, VA, 22314 | www.pharmacyHIT.org | 571-312-2904 |
Formed in the fall of 2010, the Collaborative’s focus is to assure the meaningful use (MU) of standardized electronic health records (EHR) that supports safe, efficient, and effective medication use, continuity of care, and provide access to the patient-care services of pharmacists with other members of the interdisciplinary patient care team.

The Collaborative seeks to ensure that pharmacist-provided patient care services are integrated into the National HIT interoperable framework. The Collaborative’s founding organizations represent pharmacists in all patient care settings and other facets of pharmacy, including pharmacy education and pharmacy education accreditation. The Collaborative’s Associate Members represent e-prescribing networks, a standards development organization, transaction processing networks, pharmacy companies, system vendors and other organizations that support pharmacists’ services. The Collaborative was founded by nine pharmacy professional associations representing over 250,000 members and includes six associate members from other pharmacy related organizations.
