

Dave Doane
Vice President, Pharmacy Services

As Talyst's Vice President of Pharmacy Services, Dave helps drive the adoption and implementation of automated systems in all care environments. His extensive experience in long-term care has given him unique insights into the needs, capabilities, and concerns of pharmacies that service nursing facilities. He is passionate about the benefits of Remote Dispensing, and anxious to share those benefits with the countless pharmacies and facilities with which he has cultivated relationships over the years.

Dave began his professional career more than two decades ago as a Staff Pharmacist for Evergreen Pharmaceutical, servicing long-term care facilities throughout Western Washington. He was soon promoted to Pharmacy Manager, where his eye for detail and natural leadership skills were critical to the implementation of automated storage systems and a number of large computer conversions—all while maintaining a 24/7, 365 day a year pharmacy operation.

In the mid 90's Evergreen was acquired by Omnicare and soon another promotion made him Unit Manager, where he managed the successful growth of all product lines and services, including IV pharmacy, consultant pharmacy, Enteral/Urological services, Oxygen services and nursing services. When Dave left Omnicare, his Evergreen pharmacy was servicing over 15,000 beds in Western Washington.

Dave moved on to Genoa Healthcare as a member of the Executive Team and Regional Manager. His day-to-day responsibilities included developing and managing relationships with mental health clinics across the Western United States. He successfully drove the growth and expansion of Genoa, including opening four pharmacies in 18 months, all of which were profitable in 90 days.

Dave earned his Bachelor of Pharmacy from Washington State University, is a former board member of the Washington State Pharmacy Association, is active in the American Society of Consultant Pharmacists, and serves on the Washington State University College of Pharmacy Alumni Advisory Board.
