

## Will Lockwood

Will Lockwood is assistant executive director of the American Society for Automation in Pharmacy (ASAP), a membership organization dedicated to fostering understanding of the role that technology plays in assisting pharmacists to promote patient safety and the proper use of medications, comply with laws and regulations, and operate their practices more efficiently. Will is also director of editorial content for ComputerTalk Associates, Inc., publisher of *ComputerTalk for the Pharmacist*, a magazine that covers the role of technology in pharmacy clinical and business management. In that role, he has written and edited numerous stories highlighting practical ways in which pharmacists use technology to better manage their clinical and business operations.

He participates in the National Community Pharmacists Association's (NCPA) technology committee and has authored a chapter titled "Automation of Ambulatory Care Pharmacy Operations" in *Building Core Competencies in Pharmacy Informatics* (Fox, Thrower, Felkey; American Pharmacists Association, 2010)

Will received his B.A. from Dartmouth College, and M.A. from the University of California, Santa Barbara, and an M.Phil. from the University of Cambridge.
